ERP – ORACLE E-Business Suite

Project Name : ORACLE E-Business Suite

Role : Sr. Project implementation Officer – IT

Environment : Oracle Developer, Oracle SQL

Project Description:

ORACLE E-Business Suite

Oracle's **E-Business Suite** (also known as Applications/Apps or EB-Suite/EBS) consists of a collection of enterprise resource planning (ERP), customer relationship management (CRM), and supply-chain management (SCM) computer applications either developed or acquired by Oracle. The software utilizes Oracle's core Oracle relational database management system technology. Significant technologies incorporated into the applications include the Oracle database technologies, (engines for RDBMS, PL/SQL, Java, .NET, HTML and XML), the "technology stack" (Oracle Forms Server, Oracle Reports Server, Apache Web Server, Oracle Discoverer, Jinitiator and Sun's Java).

- Responsible for the overall coordination of installations and post installation activities of the project
- Handle the tasks of preparing and executing project plans to meet project resource, budget, and time line
- Perform responsibilities of weekly follow-up with clients after the implementation of the project
- Assigned responsibilities of defining project scope and monitoring project status
- Handle the tasks of preparing post-installation project summary, implementation process, and managing internal resources
- Responsible for reviewing templates for project life cycle like concept, analysis, design, and construction phase
- Performed responsibilities of preparing test case as well as conduct peer review of project documents
- Performing diagnostic tests and resolving issues to optimize performance.
- Providing technical support and training ERP end-users.
- Preparing development progress updates and documenting ERP processes.
- Adhering to company policies and industry regulations.
- Keeping abreast of the latest ERP upgrades and offerings.

Eastern SCA (Sales Channel Automation) Mobile apps Implementation and support for Sales Force

Project Name : Eastern SCA

Role : Sr.Project Leader

Environment : Python

Project Description:

Eastern SCA is focused on mobilizing and automating the routine activities of the sales force, customer executives and the field representatives who are on the move. It is developed exclusively to connect the mobile field sales force with the corporate back office and thereby, ensure a real-time, robust and comprehensive flow of information between both the entities. The result is a complete end-to-end field force management app focusing on integrating the planning and execution of field staff activities along with the availability of business-critical information right on time.

- Operating independently, reviewing, and directing the work of more junior staff
- Developing solutions to client problems through application of methods and tools; validates solutions to subject matter experts.
- Reporting on progress and quality, using established tooling
- Performing and executing all functional testing. Developing use cases, test scripts, and translate these for usage in automated regression testing
- Providing support for the day to day management of SCA
- Professional training in application design and development or solutions architecture or some equivalent discipline
- Performing administrative tasks such as setting up users, creating or updating fields, workflows, reports and dashboard and managing data using data loader or other tools
- Developing a continuous Salesforce training program to ensure users are always up-to-speed with new features
- Working with business colleagues to gain user acceptance and take up

MIS Reporting and Data analysis

- Built out the data and reporting infrastructure from the ground up using Excel and SQL to provide real-time insights into the product, marketing funnels, and business KPIs.
- Providing expertise in data storage structures, data mining, and data cleansing
- Analyzing sales figures, market research, logistics, or transport data
- Develop the dashboards and charts for marketing team for achieving targets

Sr.Officer-IT

Eastern Condiments(P)Ltd, Adimaly

ERP Support

Project Name : ORION

Role : Sr.Application support Executive – EDP

Environment : Oracle Developer, Oracle SQL

Project Description:

ORION

ORION™ Enterprise is a dynamic enterprise resource planning solution that allows organizations to smoothly integrate disparate teams, functions, processes and systems. The ERP platform, with built-in CRM and SCM capabilities, offers organizations sharp insights into and control over operations across the value chain through a single application. With its powerful suite of tools such as workflow management and portal and a set of ready functional modules, ORION™ Enterprise addresses the needs and challenges of diverse industries.
